PROFESSIONAL SUMMARY

Flutter Engineer with 4+ years of professional experience building and releasing production iOS and Android applications. Flutter and Dart, BLoC and Cubit, Clean Architecture, REST APIs, offline persistence, push notifications, Firebase, maps and geolocation, payments, real-time communication and smartwatch companion apps, with hands-on mobile performance profiling and production debugging. Shipped wellness and wearable, smart parking, enterprise collaboration, healthcare and property products end to end through the App Store and Google Play, alongside API and microservices integrations. Supporting strength in .NET/ASP.NET Core, Laravel, React/Next.js and SQL. Works daily with AI development tools (Claude, Claude Code, ChatGPT/Codex, Gemini, Google AI Studio) using disciplined context and token management, with human review before every merge.

TECHNICAL SKILLS

Mobile Engineering: Flutter, Dart, BLoC, Cubit, GetX, Provider, Clean Architecture, SOLID, Dio, Firebase, SQLite, Hive, Swift/iOS, Kotlin/Android

Mobile Delivery: App Store Connect, TestFlight, Transporter, Google Play Console, APK/AAB builds, signing and provisioning, FCM/APNs, Firebase Crashlytics, App Review resolution

Architecture & Integration: REST APIs, repository pattern, dependency injection, authentication, JWT, OAuth2, RBAC, offline caching, SignalR, WebSockets, WebRTC, Google Maps and geolocation, Tap Payments, Apple Pay, MADA, Visa/Mastercard

AI Engineering: Claude, Claude Code, ChatGPT, OpenAI Codex, Gemini, Google AI Studio, Cursor, GitHub Copilot, Model Context Protocol (MCP) - repository-scale code analysis, debugging, architecture reasoning, refactoring, test generation and documentation; context and token-budget management, scope selection, model comparison, human review before merge

Backend & Web: C#, .NET, ASP.NET Core, Entity Framework Core, PHP, Laravel, React, Next.js, JavaScript, TypeScript, SQL Server, MySQL, PostgreSQL

DevOps & Tools: Git, GitHub, GitHub Actions, Azure DevOps, Docker, CI/CD, Linux/Ubuntu, Jira, VS Code, Android Studio, Xcode, Postman

PROFESSIONAL EXPERIENCE

Cave Technologies (ICAD Holding)

Flutter Mobile / Full-Stack Developer | United Arab Emirates | Sep 2025 - Present

- Develop and modernize production Flutter applications using BLoC and Clean Architecture, REST APIs, offline caching, notifications, maps, and platform-specific iOS and Android integrations.
- Build consumer-facing mobile product features, including Cave Health, the Flutter companion app for the Cave smartwatch: wellness dashboard, activity and step goals, sleep history, heart rate, SpO2, stress and temperature readings.
- Implemented iPark features: interactive parking zones, server-synchronised sessions, wallet and top-up, payments, receipts, notifications, and API-v2/microservices migration for a multi-region KSA rollout.
- Modernized Cave App modules across document approvals, global navigation, notification center, payroll and attendance, face-AI workflows, maps, and networking.
- Migrated Cave App Documents from legacy code to feature-based BLoC architecture: document APIs expanded from 6 to 25 endpoints, 58 automated tests, zero analyzer errors.
- Contribute across .NET Core/EF Core services, React/Next.js interfaces, SQL, CI/CD, Docker, real-time communication and AI/computer-vision integrations.
- Apply AI development tools (Claude Code, ChatGPT/Codex, Gemini) to large codebases using structured context and token management - scoping files, summarizing modules, and staging multi-step refactors - to accelerate analysis, debugging, testing, and documentation while keeping every output human-reviewed before merge.

Estheva Polyclinic

Full-Stack Developer | United Arab Emirates | Nov 2024 - May 2025

- Built a clinic management platform with Laravel APIs, a Flutter mobile application, and a React admin dashboard; implemented scheduling, notifications, authentication, and payment integrations.
- Reduced database query execution time from approximately 2,000 ms to 200 ms (90% improvement) through indexing, query optimization, and caching.

Sejourne

Flutter Mobile Developer | United Arab Emirates | Jun 2024 - Sep 2024

- Developed and released a 3-app holiday-rental ecosystem (Guest, Owner, PMS) with REST API integration, offline persistence, real-time notifications, responsive UI, and Swift/Kotlin platform integrations.

ASR Technology

Flutter Developer | United Arab Emirates | Mar 2024 - Jun 2024

- Built Flutter applications using GetX, Clean Architecture, REST APIs, Git workflows, and vetted third-party packages from pub.dev.

Infotech

Application Developer | Khartoum, Sudan | Jun 2021 - Apr 2023

- Developed 8+ cross-platform Flutter applications with responsive UI/UX, local persistence (SQLite/Hive), API integrations, and end-to-end Google Play and App Store release support.

SELECTED PRODUCTION APPS & PROJECTS

Cave Health - Flutter companion app for the Cave smartwatch: wellness dashboard, activity, sleep and vitals | Google Play

- Flutter companion application for the Cave smartwatch: activity tracking, step goals, sleep history, and heart rate, SpO2, stress and temperature readings in a single wellness dashboard.
- Built on-demand measurement, workout logging and wearable integration; released on Google Play.

[Google Play](#)

iPark App - Smart parking: interactive maps, sessions, wallet, payments, fines | UAE & KSA

- Implemented and refactored core mobile flows: zone mapping, server-synchronised parking sessions, iOS Live Activities, wallet top-up, receipts, notifications, API-v2 migration, and KSA regional configuration.
- Integrated Apple Pay, MADA, Visa/Mastercard and Tap payment flows; supported store releases and production troubleshooting.

[App Store](#) | [Google Play](#) | [user.ipark-ksa.com](#)

Cave App - Enterprise platform: chat, documents, approvals, payroll, attendance, calls, maps

- Led Flutter modernization across Documents, global navigation, notifications, face attendance, and networking, applying BLoC and Clean Architecture with production release fixes.

[App Store](#) | [Google Play](#) | [cave.business](#)

Estheva - Digital clinic and appointment platform: patient app, admin, web

- Full-stack healthcare workflows across Laravel, Flutter, React and Next.js: service discovery, doctor profiles, appointment scheduling, messaging, payments, database optimization.

Vactals Suite - Holiday-rental ecosystem: Guest, Owner and PMS apps | Live on Google Play

- Guest: property discovery, listings, wishlists and booking management. Owner: dashboard, reservation calendar, statements and multi-step property listing. PMS: revenue, occupancy and booking-trend reporting, maintenance and housekeeping operations, exportable PDF/Excel reports.

ENGINEERING DELIVERY & RELEASE EXPERIENCE

- **Store delivery:** App Store Connect, TestFlight, Transporter, signing and provisioning, privacy and permission review, screenshots and metadata, App Review resolution; Android APK/AAB builds, signing, Google Play Console workflows, runtime permissions and device compatibility.
- **Real-time and networking:** SignalR, WebSockets, WebRTC, TURN/STUN, API interceptors, timeout and error handling, secure token handling, and restricted-network troubleshooting.

EDUCATION & PROFESSIONAL DEVELOPMENT

Bachelor of Honours in Information and Communication Technology

University of Science and Technology, Omdurman, Sudan | 2016 - 2021 | GPA: 3.39 / 4.0

Courses: Flutter Clean Architecture (Udemy, 2022) | Laravel 8 (Laracasts, 2023) | CCNA Network+ (2021) | IoT (Edraak, 2021)

Languages: Arabic (Native) | English (Advanced)
