

GASAN MANSOUR OMER

Flutter Mobile Developer | Full-Stack Software Engineer | AI-Assisted Development

Mobile (Flutter/Dart) - Backend (.NET / Laravel) - Web (React / Next.js) - Cloud, CI/CD & App Release

United Arab Emirates | +971 54 567 1677 | gasan1288@gmail.com

LinkedIn: [linkedin.com/in/gasan-mansour](https://www.linkedin.com/in/gasan-mansour) | GitHub: github.com/Gasan33 | Portfolio: gasan33.github.io/gasan-portfolio

PROFESSIONAL SUMMARY

Flutter-focused Software Engineer with nearly 4 years of professional experience delivering production mobile, web, and backend systems across smart parking, enterprise collaboration, healthcare, and property management. Strong in Flutter/Dart, BLoC and GetX, Clean Architecture, REST APIs, .NET/ASP.NET Core, Laravel, React/Next.js, Firebase, and SQL. Hands-on with payments, maps and geolocation, push notifications, real-time communication, offline persistence, iOS/Android release pipelines, and API/microservices migrations. Works daily with AI development tools (Claude and Claude Code, ChatGPT and OpenAI Codex, Google AI Studio, Gemini), applying disciplined context and token management to keep large-repository work accurate, reviewable, and cost-efficient.

TECHNICAL SKILLS

Mobile: Flutter, Dart, BLoC, Cubit, GetX, Provider, Clean Architecture, SOLID, Firebase, Dio, SQLite, Hive, Swift/iOS, Kotlin/Android, App Store Connect, TestFlight, Google Play Console

Backend & Web: C#, .NET, ASP.NET Core, Entity Framework Core, PHP, Laravel, REST APIs, GraphQL, SignalR, WebSockets, Node.js, React, Next.js, JavaScript, TypeScript, HTML5, CSS, SASS

Data & Integrations: SQL Server, MySQL, PostgreSQL, JWT, OAuth2, RBAC, Tap Payments, Apple Pay, MADA, Visa/Mastercard, Google Maps, geolocation, push notifications (FCM/APNs), WebRTC

DevOps & Tools: Git, GitHub, GitHub Actions, Azure DevOps, Docker, CI/CD, Linux/Ubuntu, Jira, VS Code, Android Studio, Xcode, Postman, Firebase Crashlytics

AI Development Tools: Claude, Claude Code, ChatGPT, OpenAI Codex, Google AI Studio, Gemini, GitHub Copilot, Cursor, Model Context Protocol (MCP)

AI Engineering Practice: Prompt engineering, context-window and token budget management, repository-scale context packaging, scope selection, retrieval-augmented workflows, model selection for cost and quality, AI-assisted review, refactoring, test generation and documentation with human verification

Practices: Agile/Scrum, code review, unit and widget testing, performance profiling, release management, technical documentation, cross-functional collaboration

PROFESSIONAL EXPERIENCE

Cave Technologies (ICAD Holding)

Flutter Mobile / Full-Stack Developer | United Arab Emirates | Sep 2025 - Present

- Develop and modernize production Flutter applications using BLoC and Clean Architecture, REST APIs, offline caching, notifications, maps, and platform-specific iOS and Android integrations.
- Migrated Cave App Documents from legacy code to feature-based BLoC architecture: document APIs expanded from 6 to 25 endpoints, 58 automated tests, zero analyzer errors.
- Modernized Cave App modules across document approvals, global navigation, notification center, payroll and attendance, face-AI workflows, maps, and networking.
- Implemented iPark features: interactive parking zones, server-synchronised sessions, wallet and top-up, payments, receipts, notifications, and API-v2/microservices migration for a multi-region KSA rollout.
- Contribute across .NET Core/EF Core services, React/Next.js interfaces, SQL, CI/CD, Docker, real-time communication and AI/computer-vision integrations.
- Apply AI development tools (Claude Code, ChatGPT/Codex, Gemini) to large codebases using structured context and token management - scoping files, summarizing modules, and staging multi-step refactors - to accelerate analysis, debugging, testing, and documentation while keeping every output human-reviewed before merge.

Estheva Polyclinic

Full-Stack Developer | United Arab Emirates | Nov 2024 - May 2025

- Built a clinic management platform with Laravel APIs, a Flutter mobile application, and a React admin dashboard; implemented scheduling, notifications, authentication, and payment integrations.
- Reduced database query execution time from approximately 2,000 ms to 200 ms (90% improvement) through indexing, query optimization, and caching.

Sejourne

Flutter Mobile Developer | United Arab Emirates | Jun 2024 - Sep 2024

- Developed and released a 3-app holiday-rental ecosystem (Guest, Owner, PMS) with REST API integration, offline persistence, real-time notifications, responsive UI, and Swift/Kotlin platform integrations.

ASR Technology

Flutter Developer | United Arab Emirates | Mar 2024 - Jun 2024

- Built Flutter applications using GetX, Clean Architecture, REST APIs, Git workflows, and vetted third-party packages from pub.dev.

Infotech

Application Developer | Khartoum, Sudan | Jun 2021 - Apr 2023

- Developed 8+ cross-platform Flutter applications with responsive UI/UX, local persistence (SQLite/Hive), API integrations, and end-to-end Google Play and App Store release support.

SELECTED PRODUCTION APPS & PROJECTS

Cave App - Enterprise platform: chat, documents, approvals, payroll, attendance, calls, maps

- Led Flutter modernization across Documents, global navigation, notifications, face attendance, and networking, applying BLoC and Clean Architecture with production release fixes.

[App Store](#) | [Google Play](#) | [cave.business](#)

iPark App - Smart parking: interactive maps, sessions, wallet, payments, fines | UAE & KSA

- Implemented and refactored core mobile flows: zone mapping, server-synchronised parking sessions, iOS Live Activities, wallet top-up, receipts, notifications, API-v2 migration, and KSA regional configuration.
- Integrated Apple Pay, MADA, Visa/Mastercard and Tap payment flows; supported store releases and production troubleshooting.

[App Store](#) | [Google Play](#) | [user.ipark-ksa.com](#)

Base & Quantum by Cave - Tender/BOQ management and procurement, asset and facility management | App Store / Google Play

- Flutter and .NET feature work across tender and BOQ workflows (including dynamic BOQ columns), procurement/RFQ and asset-management flows, with architecture modernization and production delivery.

Vactals Suite - Holiday-rental ecosystem: Guest and Owner apps | Live on Google Play

- Guest app: property discovery, listings, wishlists, booking flow and booking management. Owner app: dashboard, reservation calendar, statements, messaging and multi-step property listing workflows.

[Guest app](#) | [Owner app](#) | [vactals.com](#)

Enterprise Face Attendance & Intercom - Computer vision, access control, real-time communication

- Integrated face-recognition and liveness workflows, Android kiosk camera flows, .NET attendance APIs, automatic door actions, and WebRTC/SignalR/TURN diagnostics.

Interactive Engineering Portfolio - Scroll-driven case-study site | [gasan33.github.io/gasan-portfolio](#)

- Zero-dependency interactive case-study site: canvas environments, scroll-choreographed chapters, reduced-motion support, static build.

Estheva - Digital clinic and appointment platform: patient app, admin, web

- Full-stack healthcare workflows across Laravel APIs, Flutter, React and Next.js: service discovery, doctor profiles, appointment scheduling, messaging, payments and database optimization.

ENGINEERING DELIVERY & RELEASE EXPERIENCE

- **iOS delivery:** App Store Connect, TestFlight, Transporter, signing and provisioning, permission and privacy review, screenshots and metadata, and App Review issue resolution.
- **Android delivery:** release APK/AAB builds, signing, Google Play Console workflows, runtime permissions, device compatibility, and production verification.
- **Real-time and networking:** SignalR, WebSockets, WebRTC, TURN/STUN, API interceptors, timeout and error handling, secure token handling, and restricted-network troubleshooting.
- **AI-enabled workflow:** repository analysis, refactoring plans, debugging, test generation, and technical writing with Claude Code, ChatGPT/Codex, and Google AI Studio/Gemini - managing context windows, token budgets, and prompt structure so results stay accurate on large production codebases.

EDUCATION & PROFESSIONAL DEVELOPMENT

Bachelor of Honours in Information and Communication Technology

University of Science and Technology, Omdurman, Sudan | 2016 - 2021 | GPA: 3.39 / 4.0

Courses: Flutter Clean Architecture (Udemy, 2022) | Laravel 8 (Laracasts, 2023) | CCNA Network+ (2021) | IoT (Edraak, 2021)

Languages: Arabic (Native) | English (Advanced - Professional Working Proficiency)
